

1' 6 9/16"

A technical drawing of a roof structure. A cyan-colored roof beam is supported by four vertical orange posts. To the right, a green structure is shown, which appears to be a chimney or a vertical support. A dimension line above the green structure indicates a distance of 1' 6 9/16" from the left edge of the green structure to the peak of the roof. Another dimension line below the green structure indicates a height of 10' 4 1/4" from the base of the green structure to the peak of the roof. The drawing uses various colors to distinguish components: cyan for the roof, orange for the posts, and green for the vertical structure.
